DEPARTMENT OF TELECOMMUNICATIONS AND ENERGY

SECOND SET OF INFORMATION REQUESTS TO  
KEYSPAN ENERGY DELIVERY NEW ENGLAND

D.T.E. 05-8

Respondent: Theodore Poe, Jr.

Information Request DTE 2-5

Q. Please refer to page 10 of Exhibit EDA-1. What was the cost increase in trucking when considering alternate suppliers of LNG?

A. For the winter of 2004/05, the Company pays between \$0.70/MMBtu and \$1.33/MMBtu for delivery of LNG from DOMAC to the various KeySpan LNG facilities, based on the applicable Transgas Winter Distance Commodity Rate Table.

For each of the four alternate LNG sources cited on page 10 of Exhibit EDA-1, under the same Transgas tariffs, the corresponding unit prices for delivery to the Company's Commercial Point facility would have been:

<u>LNG Source</u>	<u>Unit Price for Delivery</u>
NSTAR, Hopkinton, MA	\$0.94/MMBtu
Transco, Carlstadt, NJ	\$2.28/MMBtu
Philadelphia Gas Works Philadelphia, PA	\$2.73/MMBtu
Gaz Metropolitain, Montreal, Canada	\$2.82/MMBtu
